Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary**Application No.**

10/660,524

Applicant(s)

ELI BERLILLION, BRIAN

Examiner

LUNA CHAMPAGNE

Art Unit

3627

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 April 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-23 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-23 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SF/ICE)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Applicant's submission filed on 4/2/08 has been entered. Claims 1-23 are presented for examination.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 6-10, 12-15, 18-21, and 23 are rejected under 35 U.S.C. 102(e) as being unpatentable by Bloom (6,974,928 B2), in view of Beane (2003/0163388 A1).

Re claims 1 and 13, Bloom discloses a method of delivering one of a plurality of identical products (*same SKU items*) associated with a seller to a purchaser/a plurality of purchasers, said method comprising: (a) a first delivery module for/transporting the identical products in a delivery circuit that includes a plurality of delivery nodes by transporting the identical products between delivery nodes at a first speed (*see e.g. col. 2, lines 50-56, col. 13, lines 62-64*); (c) when (b) is true then determining which of said plurality of delivery nodes is closest to said purchaser (*see e.g. col. 10, lines 51-57*); (d) a second delivery module associated with said distribution module for /providing the closest one of said identical products to the delivery node identified in (c) along the delivery circuit (*see e.g. col. 8, lines 21-24*) and then transporting said closest one of said identical products from the delivery node identified in (c) to said purchaser(*see e.g. fig. 1 and col. 6, lines 55-59*).

Bloom does not explicitly disclose determining if one of said identical products being transported within the delivery circuit has been ordered by one of the purchasers

However Bean discloses a distribution module associated with said first delivery module for/determining if one of said identical products being transported within the delivery circuit has been ordered by one of the purchasers (*see e.g. paragraph 0041*);

Therefore, at the time of the invention, it would have been obvious to a person of ordinary skill in the art, to modify Bloom and include the step of determining if one of said identical products being transported within the delivery circuit has been ordered by one of the purchasers, as taught by Beane, in order to minimize errors by delivering the right product to the right customer and therefore increase customer satisfaction and loyalty.

Re claims 2 and 14, Bloom does not explicitly disclose a method wherein (a) further comprises associating each of said identical products with a unique tracking number and wherein (*see e.g. col.2, lines 35-41*), (d) further comprises determining the destination address of said purchaser and pushing said unique tracking number and destination address to the delivery node identified in (c) prior to the physical arrival of the one of said identical products at the delivery node identified in (c) (*see e.g. col. 1, lines 42-45*).

Re claims 3 and 15, Bloom discloses a method/system, wherein (a) further comprises associating each of said identical products with a destination node and

Art Unit: 3627

wherein step (c) further comprises recording said delivery node identified in (c) as the destination node for said closest one of said identical products (*see e.g. col. 12, lines 26-30*).

Re claims 6 and 18, Bloom discloses a method/system, wherein (d) further comprises transporting the closest one of said identical products through a series of delivery nodes to the delivery node identified in (c) (*see e.g. col. 6, lines 14-21*).

Re claims 7 and 19, Bloom discloses a method/system, wherein (d) further comprises storing the closest one of said identical products at the delivery node identified in (c) (*see e.g. col. 6, lines 32-40*).

Re claims 8 and 20, Bloom discloses a method/system, wherein the transportation of the product from said identified delivery node to the purchaser is conducted at a second speed wherein said first speed is less than said second speed (*see e.g. col. 143, lines 1-5*).

Re claims 9 and 21, Bloom discloses a method/system, wherein the products are transported within a sub-set of said delivery nodes to service a particular section of said delivery circuit (*see e.g. col. 129, lines 35-37*).

Re claim 10, Bloom discloses a method/system, further comprising the delivery of the products from the seller to the delivery circuit (*see e.g. col.8, lines 9-24*).

Re claims 12 and 23, Bloom discloses a method/system, further comprising: (I) determining whether there is a cluster of products within said delivery circuit; (II) *(the needed quantity is zero)*, when (I) is true, then rebalancing the flow of said products within said delivery circuit by re-directing at least some of said products (*see e.g. col. 53, lines 5-11*).

3. Claims 4, 5, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bloom (6,974,928 B2), in view of Official Notice.

Claims 4, 5, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bloom (6,974,928 B2), in view of Official Notice.

Re claims 4, 5, 16 and 17, Bloom discloses a method/system, wherein (a) further comprises associating each of said identical products with a destination node and a default destination node, wherein said destination node is the closest delivery node to the current position of the product (*see e.g. col. 10, lines 41-51*).

Bloom does not explicitly disclose a method/system where the default destination node is a delivery node adjacent to the destination node; wherein when the product reaches the destination node, (a) further comprises changing the destination node so that it corresponds to the previous default destination node and to change the default

destination node by choosing from the set of delivery nodes adjacent to the destination node.

However, the Examiner takes Official Notice that, it is well known in the art that suppliers first try to deliver to the location closest to the customer and, as a backup, they have a default delivery location, in case delivery is not possible at the first location. It is beneficial in terms of time and money to choose locations in close proximity, as mentioned in Bloom column 10, lines 41-57, where a list of locations is provided to the customer.

Therefore, at the time of the invention, it would have been obvious to a person of ordinary skill in the art, to modify Bloom and include the steps of where the default destination node is a delivery node adjacent to the destination node; wherein when the product reaches the destination node, (a) further comprises changing the destination node so that it corresponds to the previous default destination node and to change the default destination node by choosing from the set of delivery nodes adjacent to the destination in order in order to save time, provide faster service and increase productivity.

4. Claims 11 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bloom (6,974,928 B2), in view of Kennedy et al. (7,085,729 B1).

Re claims 11 and 22, Bloom does not explicitly disclose a method/system, further comprising: (i) estimating demand for the products at each delivery node associated

with said delivery circuit; (ii) providing a sufficient quantity of the products from the seller to said delivery circuit for prospective delivery.

However, Kennedy et al. disclose a method/system, further comprising: (i) estimating demand for the products at each delivery node associated with said delivery circuit; (ii) providing a sufficient quantity of the products from the seller to said delivery circuit for prospective delivery (*see e.g. col.2, lines 64-67*).

Therefore, at the time of the invention, it would have been obvious to a person of ordinary skill in the art, to modify Bloom and include the steps of estimating demand for the products at each delivery node associated with said delivery circuit; (ii) providing a sufficient quantity of the products from the seller to said delivery circuit for prospective delivery, as taught by Kennedy et al., in order to better plan and manage distribution of products.

Response to Arguments

5. Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new grounds of rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luna Champagne whose telephone number is (571) 272-7177. The examiner can normally be reached on Monday - Friday 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Florian Zeender can be reached on (571) 272-6790. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
